

KE1000/KE2000/JX-100/ JX200/FX-1/FX-2 Series Training Courses

JUKISmart Solutions

Programming and Operations Course

Due to the strong similarities between programming on models, this course will cover all at the same time. Vision data (unique to the KE2055/60/80) will be covered at the end so customers who have only KE2050/70, FX1, FX2, JX-100 and JX-200 machines can leave the class early.

Who Should Attend:

Personnel responsible for the daily setup, operations, and programming of the machines. New operators and operators who need a little extra training are the main intended audience.

NOTE: This course will be taught at the "Manager" user level. Features not available to a user at this level will NOT be covered in this course. The service and calibration class is offered for the higher level users.

Length:

4 days

Prerequisites:

Knowledge of basic SMT concepts and components. Familiarity with Microsoft® Windows.

Course Description:

This course is designed to provide operators with operation, routine maintenance, and basic troubleshooting skills. It includes classroom lecture and hands on training on the machines. The content is basically identical to the training provided on site when a machine is first installed.

Course Agenda:

1. Introduction to Juki Automation Systems Service Network
 - 1.1. Help Numbers
 - 1.2. Ordering Parts
2. Machine Documentation
 - 2.1. Instruction Manual
 - 2.2. Error Code Lists
 - 2.3. Technical Bulletins
3. Model Overview
 - 3.1. KE1000
 - 3.2. KE2050/55
 - 3.3. KE2060
 - 3.4. KE2070/1070
 - 3.5. KE2080/1080
 - 3.6. FX1/FX2

KE1000/KE2000/JX-100/ JX200/FX-1/FX-2 Series Training Courses

JUKI

JUKISmart Solutions

- 3.7. JX-100/JX-200
- 4. Machine Overview
 - 4.1. Safety features (key locks, covers, etc.)
 - 4.2. XY Axis
 - 4.3. Assembly Heads
 - 4.3.1. MNL Head
 - 4.3.2. LNC60
 - 4.3.3. IC (vision) head
 - 4.4. Conveyor System
 - 4.5. Feeders
 - 4.5.1. Loading/unloading
 - 4.5.2. Setting the pitch
 - 4.5.3. Different styles available
 - 4.6. Laser Align Basics – How It Works
 - 4.6.1. MNL
 - 4.6.2. LNC60
 - 4.6.3. FMLA
 - 4.6.4. CDS Sensor
 - 4.7. ATC
 - 4.7.1. Manual nozzle removal
 - 4.8. Cal Block
- 5. Software Overview
 - 5.1. Windows XP basics
 - 5.2. User groups
- 6. Setup Data
 - 6.1. Machine Setup
 - 6.1.1. Nozzle Allocation
 - 6.1.2. Head Vacuum with No Nozzle
 - 6.1.3. Device Enable
 - 6.1.4. Conveyor
 - 6.1.5. Others
 - 6.2. I/O Manual Control
 - 6.2.1. Head
 - 6.2.2. Laser control
 - 6.2.3. Conveyor
 - 6.2.4. MTC
 - 6.2.5. Vision

KE1000/KE2000/JX-100/ JX200/FX-1/FX-2 Series Training Courses

JUKI

JUKISmart Solutions

- 6.2.6. Others
- 6.3. Warm Up
- 7. Programming In-depth
 - 7.1. PWB Data (Layout Offsets, Matrix Type PWBs, BOC Mark Teaching)
 - 7.1.1. Back height
 - 7.1.2. Thickness vs. height
 - 7.1.3. BOC Mark database
 - 7.2. Placement Data (Rotation, Local BOC Marks, Optimized Order View)
 - 7.2.1. Place tracking
 - 7.2.2. Layers
 - 7.3. Component Data (Nozzle Selection, Laser Height, Laser Algorithm, Expansion Information)
 - 7.3.1. Auto measuring components
 - 7.4. Pick Data (Alternate Feeders, Z Height, List View)
 - 7.4.1. Pick tracking
- 8. Optimization
 - 8.1. Special FX1/FX2 requirements
 - 8.2. Tips for obtaining the best times
 - 8.3. Feeder Layout
 - 8.4. Nozzle layout
- 9. Database
 - 9.1. Using the component database
 - 9.2. Component Types
- 10. Production In-depth
 - 10.1. Single Cycle
 - 10.2. Dry Run
 - 10.3. Trial Run
 - 10.4. Parts Information
 - 10.5. Management information
- 11. Practical Exercise
 - 11.1. Create a program from scratch and run it on the machines.
- 12. Routine Maintenance
 - 12.1. Lower Shaft Cleaning and Lubrication
 - 12.2. Filter inspection/replacement
 - 12.3. Nozzle Cleaning
 - 12.4. Cleaning the Lasers
 - 12.4.1. Checking the Lasers Using Laser Diagnostics

KE1000/KE2000/JX-100/ JX200/FX-1/FX-2 Series Training Courses

JUKI

JUKISmart Solutions

- 12.5. Air Path
- 12.6. Watching for Water Build Up
 - 12.6.1. Removing Water Build Up
- 12.7. Other Lubrications (Linear Guides)
- 13. Troubleshooting
- 14. Question and Answer Session
- 15. Vision Data (KE2060/80 Only)
 - 15.1. Standard vision components
 - 15.1.1. ICs
 - 15.1.2. Connectors
 - 15.1.3. Outline Recognition
 - 15.1.4. BGA
 - 15.1.4.1. BGA Editor
 - 15.1.4.2. Ball Inspection
 - 15.2. Light control
 - 15.3. Vision Inspection
- 16. General vision components
